Synonyms (conj.): although, but, howbeit, however, nevertheless, still, though, yet. *However* simply waives discussion and (like the archaic *howbeit*) says, "be that as it may, this is true"; *nevertheless* concedes the truth of what precedes, but claims that what follows is none the less true; *notwithstanding* marshals the two statements face to face, admits the one and its seeming contradiction to the other, while insisting that it cannot, after all, withstand the other. *Yet* and *still* are weaker than *notwithstanding,* while stronger than *but. Though* and *although* make as little as possible of the concession, dropping it, as it were, incidentally; as, "*though* we are guilty, thou art good"; to say "we are guilty, *but* thou art good," would make the concession of guilt more emphatic. To *condone* is to put aside a recognized offense by some act which restores the offender to forfeited right or privilege, and is the act of a private individual, without legal formalities. To *excuse* is to *overlook* some slight offense, error, or breach of etiquette; *pardon* is often used by courtesy in nearly the same sense. Compare ABSOLVE, MERCY. *Antonyms*: castigate, chasten, chastise, condemn, convict, correct, doom, punish, recompense, scourge, sentence, visit.

An innocent man may demand *acquittal,* and need not plead for *pardon. Oblivion* signifies overlooking and virtually forgetting an offense, so that the offender stands before the law in all respects as if it had never been committed. *Amnesty* conveys the same idea. *Pardon* affects individuals; *amnesty* and *oblivion* are said of great numbers. *Pardon* is oftenest applied to the ordinary administration of law; *amnesty* or *oblivion,* to national and military affairs. An *amnesty* is issued after war, insurrection, or rebellion. *Absolution* is a religious word (compare synonyms for ABSOLVE). *Remission* is a discharge from penalty; as, the *remission* of a fine. *Antonyms*: penalty, punishment, retaliation, retribution, vengeance.

Synonyms (noun): commiseration, compassion, condolence, mercy, sympathy, tenderness. *Pity* is a feeling of grief or pain aroused by the weakness, misfortunes, or distresses of others, joined with a desire to help or relieve. *Sympathy* (feeling or suffering with) implies some degree of equality, kindred, or union; *pity* is for what is weak or unfortunate; hence *pity* is often resented where *sympathy* would be welcomed. We have *sympathy* with one in joy or grief, in pleasure or pain, *pity* only for those in suffering or need. *Pity* may be only in the mind, but *mercy* does something for those who are its objects. *Compassion,* like *pity,* is exercised only with respect to the suffering or unfortunate, but combines with the tenderness of *pity* the dignity of *sympathy* and the active quality of *mercy. Commiseration* is as tender as *compassion,* but more remote and hopeless; we have *commiseration* for sufferers whom we cannot reach or cannot relieve. *Condolence* is the expression of *sympathy.* See MERCY. *Antonyms:* barbarity, brutality, cruelty, ferocity, hard-heartedness, harshness, inhumanity, mercilessness, pitilessness, rigor, ruthlessness, severity, sternness, truculence.

◆ English nouns regularly form their plurals by adding *s* or *es* to the singular; most nouns ending in *f* change the *f* to *v* and add *es*; as wol*f*, wol*ves*; hal*f*, hal*ves*. Nouns ending in *y* change it to *ies* if it is preceded by a consonant: bod*y*, bod*ies*; or merely add an *s* if it is preceded by a vowel; as donke*y*, donke*ys*. Some nouns of Old English origin have an irregular plural in *en*, as, child, childr*en*; or by a vowel change; as, mouse, *mice*; goose, *geese*; man, *men*; tooth, *teeth*. A few nouns retain the singular form unchanged in the plural; as, *deer, hose, moose, series, sheep, species, vermin.* Some such nouns, especially the names of animals, have also an alternative plural regularly formed: as, fish, *fish* or *fishes*. *Fish* is the usual collective plural; *fishes* is used to indicate more than one genus, variety, species, etc. Many words of foreign derivation retain the plural form peculiar to the languages from which they are severally derived; as, addendum, *addenda*; antithesis, *antitheses*; crisis, *crises*; datum, *data*, etc. Many nouns of this class have also a plural of the regular English form; as, appendix, *appendixes* or *appendices*; beau, *beaus* or *beaux*; cherub, *cherubs* or *cherubim*; focus, *focuses* or *foci*; index, *indexes* or *indices*, etc. Compounds commonly form the plural regularly by adding *s* or *es* to the complete word; as, armful, *armfuls*; cut-throat, *cut-throats*; football, *footballs*; teaspoonful, *teaspoonfuls*. If the last element of the compound forms its plural irregularly, the same form usually appears in the plural of the compound; as, footman, *footmen*. Nouns that end in *-man*, but are not compounds, form the plural regularly by adding *s*, as Mussulman, *Mussulmans*. Hyphenated compounds in which the principal word forms the first element change that element to form the plural; as, father-in-law, *fathers-in-law*.

Synonyms: meter, numbers, poem, poesy, rime, song, verse. In ordinary usage, *poetry* is both imaginative and metrical. *Poetry* often exists without *rime*; it may exist without regular *meter*, as in free verse; substitution may be made for *meter*, as in the Hebrew parallelism; *poetry* may be expressed in a way beautiful, lyrically comic, or sharply satiric, but it must involve, besides the artistic form, the exercise of the fancy or imagination to heighten, intensify, and integrate feeling or experience. Failing this, there may be *verse*, *rime*, and *meter*, but not *poetry*. In a very wide sense *poetry* may be anything rhythmical; as, the *poetry* of motion. There is much in literature that is beautiful and sublime in thought and artistic in construction, which is yet not *poetry*, in the strict sense, because quite devoid of the rhythmical element, and the patterned arrangement and economy of words; the dividing line between poetry and "the other music of prose" is hard to draw. Synonyms: adjourn, defer, delay, procrastinate. *Adjourn* signifies literally to put off to another day, and, hence, to any future time. A deliberative assembly may *adjourn* to another day or to another hour of the same day, and resume business, where it left off, as if there had been no interval; or it may *adjourn* to a definite later date or, when no day can be fixed, to meet at the call of the president or other officer. In common usage, to *adjourn* a matter is to hold it in abeyance until it may be more conveniently or suitably attended to; in such use *defer* and *postpone* are close synonyms of *adjourn; defer* is simply to lay or put aside temporarily; to *postpone* is strictly to lay or put aside until after something else occurs, or is done, known, obtained, or the like; but *postpone* is often used without such limitation. *Adjourn, defer,* and *postpone* all imply definite expectation of later consideration or action; *delay* is much less definite, while *procrastinate* is hopelessly vague. One who *procrastinates* gives no assurance that he will ever act. Compare HINDER, PROCRASTINATE. *Antonyms*: act, complete, consummate, dispatch, do, expedite, hasten, hurry, quicken.
